

Brand

Guidelines

01

About The Brand

Light. Camera.
Action.

Welcome to your
new rite.

Gateway is a media and entertainment company that seeks to provide solutions to problem through storytelling. Gateway Studios has a huge client profile, they have been producing both still and motion content for local and international brands.

Gateway is more than just a studio.

We are setting the new standard for storytelling & entertainment

02

Brand Logo

The core of our
being

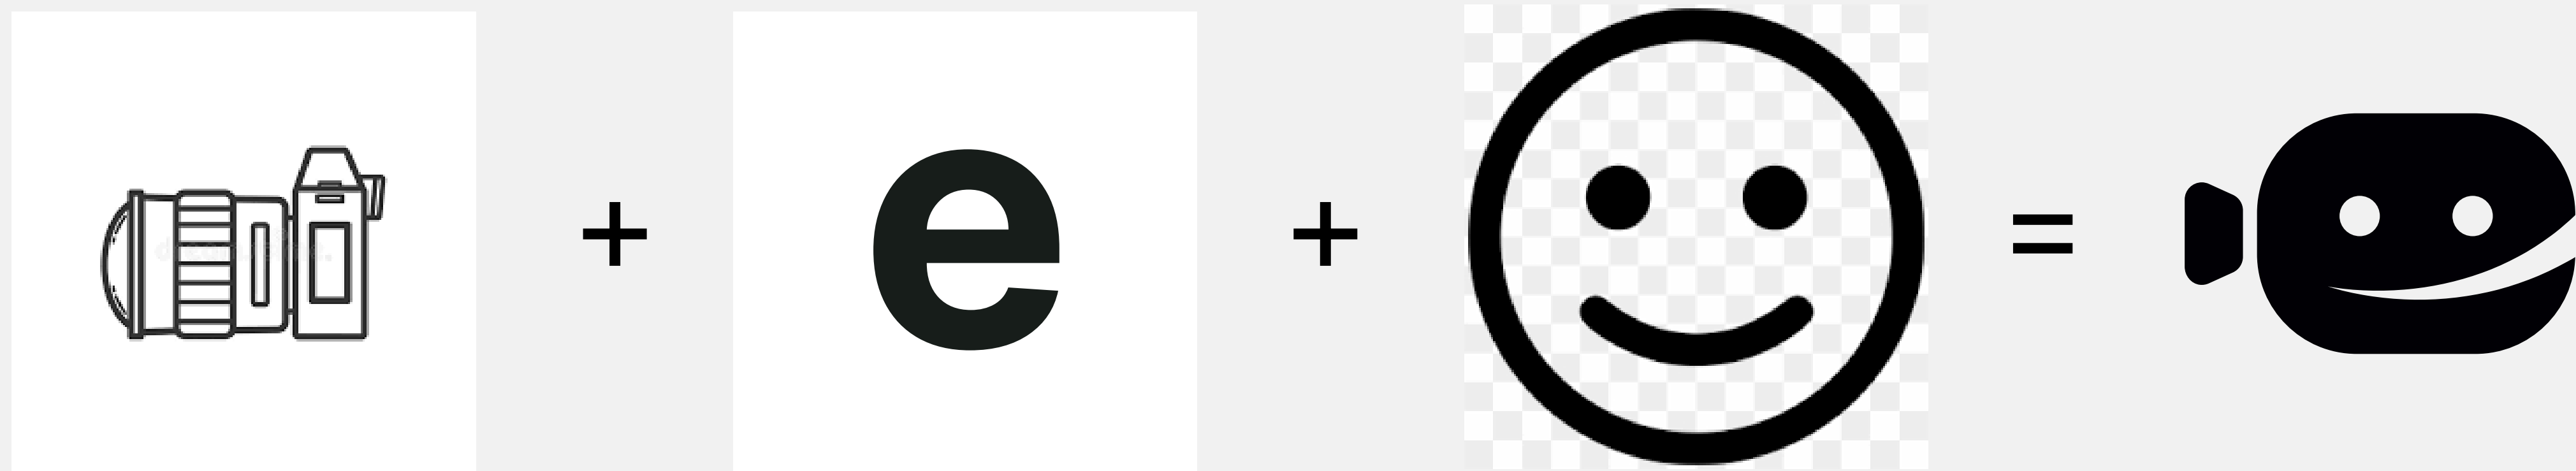

Our logo is how our customers tell us apart from a crowded industry. It's a promise of quality, creativity, consistency, and reliability.

As such, it is vital that our logo is presented correctly in every execution. This section covers these guidelines in detail.

Any use of our brand logo outside of or conflicting with the contents of this section should be considered unauthorized.

Gateway
STUDIOS

What our icon stands for.

The logo mark for Gateway Studios is a visually captivating and one-of-a-kind design that combines a camera side view, the letter E, and a smiley face. It effectively represents the brand as a media house specializing in videography and photography.

It shows our goal & promise of making our clients delighted.

The camera side view symbolizes expertise and professionalism, while the smiley face adds a friendly and welcoming element. Together, they create a strong emotional connection with viewers, evoking feelings of happiness and joy. The logo mark's adaptability allows it to be seamlessly used across various platforms, ensuring consistent brand recognition.

Primary
Lockup

Lockup Assembly

ICON HEIGHT

The height of the logo icon is exactly the size of W in the wordmark.

SEPARATION

The space between the wordmark and studio is equal to the size of the eye in the logo icon.

MINIMUM SIZE

This version is not intended for extremely small sizes. In a situation where full lockup is not visible, kindly use the icon alone

NOTE

This identity can be use with or without the “STUDIO”. Use each where it seems appropriate

Color Variations

Each brand logo lockup has several color variations for use on different background types, tones, and colors.

When in doubt, use the most legible version of the logo for the available background.

For printed executions, special care should be given to ensure logo legibility on the final media or material used.

The Gateway logo is displayed on a white background. The word "Gateway" is in a sans-serif font. "Gate" is red, "e" is a stylized red smiley face, and "way" is yellow.The Gateway logo is displayed on a black background. The word "Gateway" is in a sans-serif font. PRIMARY LOCKUP

ICON ONLY

A Scalable Identity System

Trying to fit the same mark simultaneously on a billboard and on the bottom of a documentry is a challenge. Our identity system is designed for flexibility, consistency, and brand recognition.

We have provided different logo lockups that should cover every space imaginable. Instead of trying to fit a logo into a space that is too small or crowded, simply use a different

version for maximum visual impact and clarity.

When using the icon-only mark, ensure that our brand name is visible near or in relationship with the icon. For example, a deliverable bears the icon design alone on it there should something that have a tag which displays our brand name legibly. This will help reinforce our brand recognition across multiple touchpoints.

Badge & Sticker

The badge lockup is designed for circular areas where symmetry is desired.

This can be used in conjunction with the primary brand simultaneously. On packaging, for example, the vertical lockup can be used for the primary identifying logo, and this lockup can be used as a closure seal/sticker.

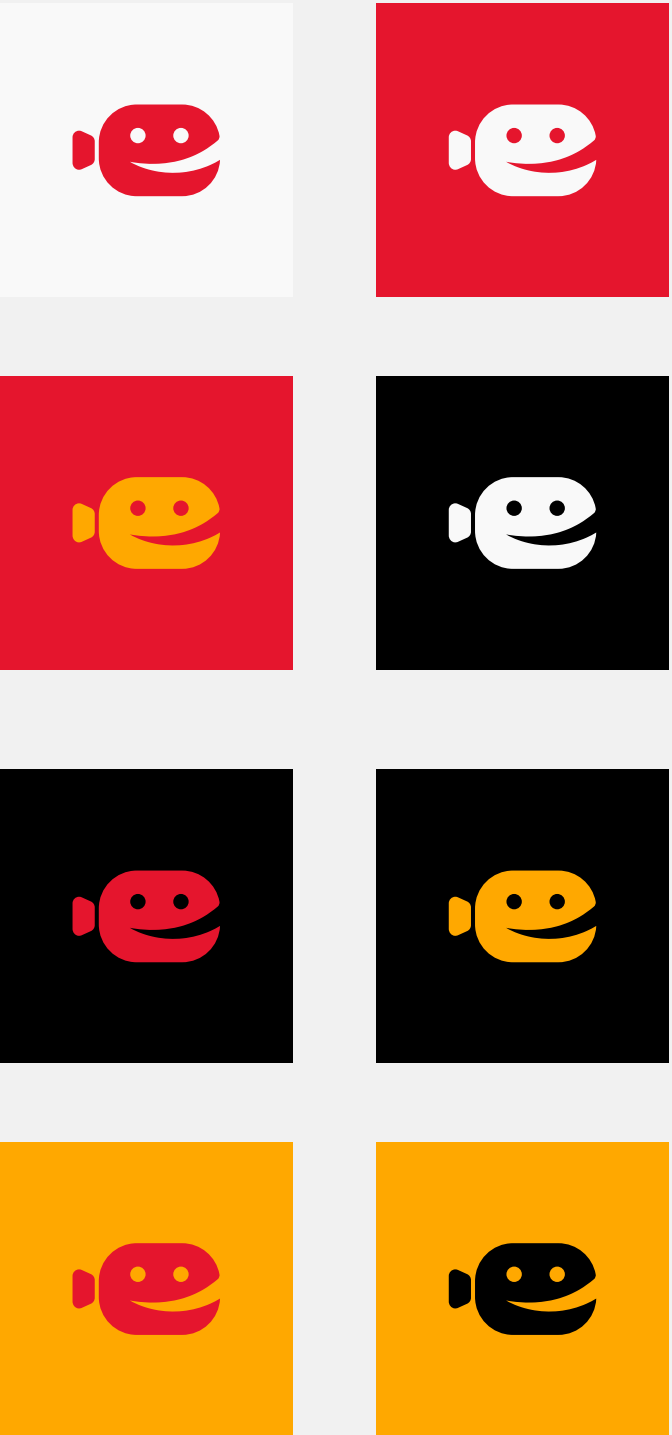

This lockup can also be used as a graphic element by replacing the text within the circle.

Icon-Only Lockup

When subtlety is desired, the gateway icon can be used in place of a full brand logo lockup.

When this mark is used, ensure that our brand name is visible near or in relationship with the icon. This will help reinforce our brand recognition.

SPECIAL COLOR USAGE

When the icon is used as a standalone element, it will accommodate any acceptable combination of our colors.

Clear Space

Clear space, or negative space, is the area that surrounds the logo that is completely clear of any other graphical element. Clear space helps the logo stand out from the rest of the elements on the page and ensures legibility, even at small sizes.

As a general rule, the more clear, or negative, space around the logo, the better.

At a minimum, there should be clear space equal to the height of the Pebble icon on all four sides of the logo. Using an element from the logo as a unit of measurement ensures enough clear space at any size.

Visualized Clear Space

Placement

On The Page

Place the logo left-aligned on the primary grid line.
If this space is not available, the logo belongs in the top or bottom left page corners.

PREFERRED

The logo is flexible and can work in multiple zones.
Align the logo to the primary grid line or any otherside including top and buttom corners.

ALTERNATE OPTIONS

At the center and middle canvas. You can explore the primary lockup
experiment with either the primary lockup or the stand alone icon.

Placement

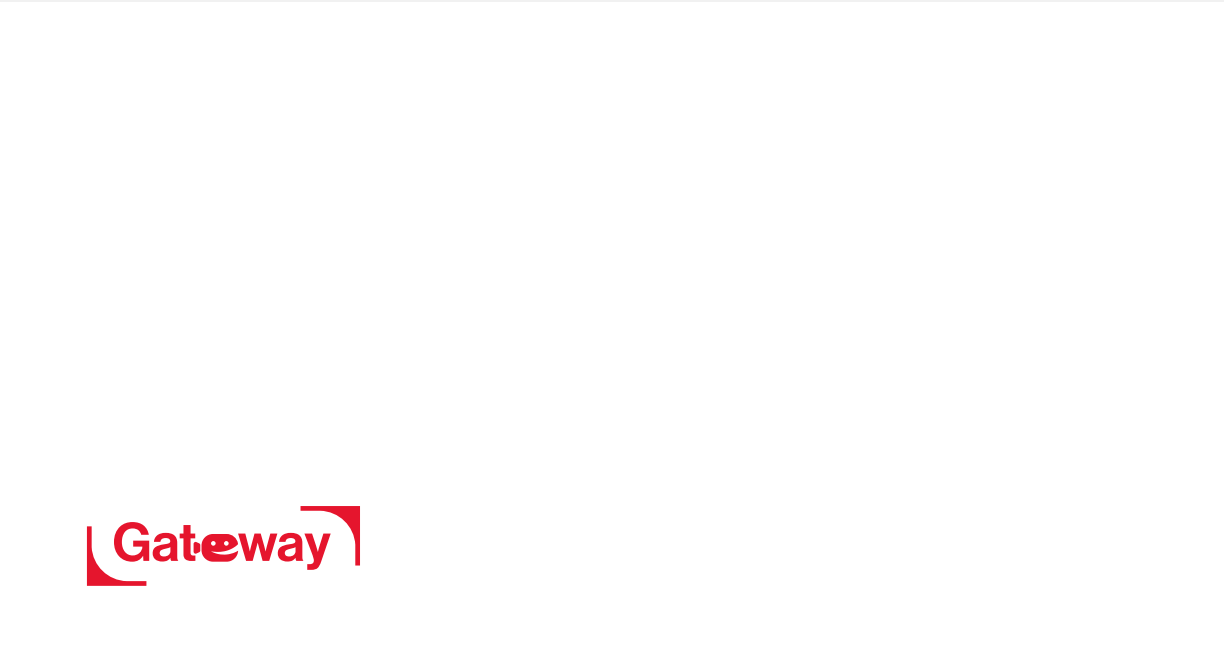

Outdoor use

When used on outdoor post for marketing, campaign materials should contain the primary lockup to enhance the recognition of the brand and the icon should also be used but in a subtle manner.

HORIZONTAL POSITION

Align the logo in the left or right hand top or corner of a rectangular hanging sign to achieve asymmetry.

VERTICAL POSITION

Align the icon in the lower center of a vertical rectangular hanging sign to achieve asymmetry.

Placement

On Social Media

When used as social media avatars, the icon-only logo should be used with the right amount of clear space on all sides.

We have developed two approved avatar images found here on this page. They are each approved for both circular and square avatars shapes of all sizes.

While the layout of these avatars should not be altered in any way, approved brand colors may be used to address special events, holidays, and seasonal changes.

ICON AVATAR

Preferred avatar for use on all platforms. All approved color combinations may be used.

WORDMARK AVATAR

All approved color combinations may be used. The wordmark must be visually centered, not mechanically.

Common Errors

Do not stretch, squash, skew, or distort the logo in any way.

Do not edit the logo color, use an off-brand color, or reduce the logo opacity.

Do not add graphic effects to the logo, including drop shadows.

Do not place the logo on a high-contrast pattern or busy photograph.

Do not change the layout or relationship between logo elements.

Do not encroach on the required clear space surrounding the logo.

Note: This is not a comprehensive list of errors. These are simply the most common or egregious errors.

04

Brand Colors

Colors sets us
apart & helps to
invoke emotion.

The colors we've chosen for our brand is a key factor in differentiation and brand recognition.

As such, it is vital that our colors are reproduced faithfully and combined in the right way. This section covers these guidelines in detail.

Any color outside of those outlined within this section will be considered unauthorized.

Red

RGB: e51524

Amber

RGB: ffab00

Primary Color Palette

The consistent use of color is vital to effective brand recognition.

Our brand should always be represented in one of the colors on this page, aside from specific recommendations within this guide.

Do not use any other/unauthorized colors.

05

Typography

The allure of typography
captivates our minds
and hearts.

Typography is the voice of our brand, expressing its personality and mood through letters. We believe typography should be both readable and intriguing, drawing the eye and engaging the mind.

This section will introduce you to our approved typefaces, our guidelines for using typography effectively, and some useful tips for best practices. Please refrain from using any typefaces that are not mentioned in this section.

Hierarchy & Weight

Inter is a variable-weight typeface, which means you are able to customize weights and angles to create an infinite number of weights. That being said, we typically stay within these four weights.

Use contrast between heavy and lighter weights to communicate relevant importance, otherwise known as hierarchy, of information.

Weights
